Hearing Protection

General Rule of Thumb: If the area you are working in has noise loud enough that you are unable to hear someone speak to you from 2-3 feet away, **you need to be wearing hearing protection.**

2018 Olympic Christmas Party is on December 13th from 4:00 - 7:00 P.M. at the Delta Hotel Minneapolis!

Last week's Bonus Question: Does this jobsite have our Stretch & Bend poster up and is it being utilized daily?

Answer: Yes and if not, posters were requested from the warehouse.

Inspect your equipment (*scaffold, aerial lifts, ladders, fall protection, electrical cords, etc., etc.*) prior to the start of each work shift.

For **inspection packets or repair tags** call **Dave Sangren @ (612) 644-3136** to have some delivered to your jobsite.

Any questions give Sturg a call (612) 221-8603

PLEASE PRINT YOUR NAME

(Foreman review sheet, verify crew members names are legible)

Visit our website: www.olympiccompanies.com

Comments:

Record to beat 378 days!!!

As of December 6, 2018 we have worked 5 days without a Lost Time Injury.

We have safely worked 8,070 hours towards our ATV goal of 150,000 hours!

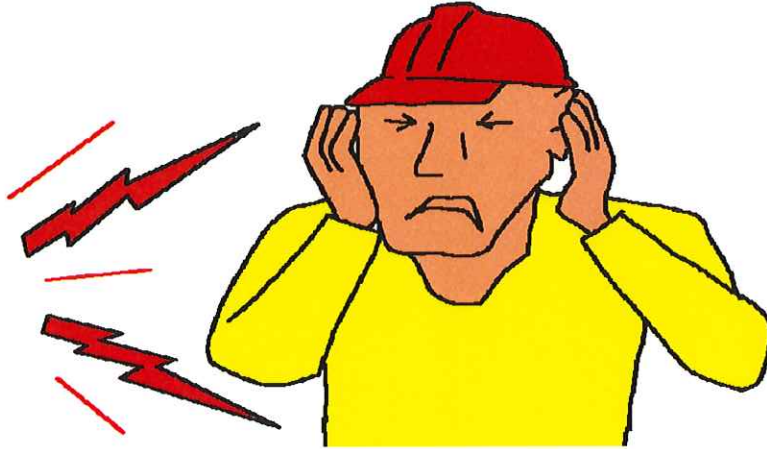

We have a co-worker that slipped and fell while walking in an area where bentonite (*a product used to absorb water from going inside the building*) was being used. This product becomes VERY slippery after it absorbs water. Due to the slip and fall, our co-worker need to have surgery last week Friday. We wish him a speedy recovery!

Toolbox Talks winner for last week: **No Winner**

This week's Bonus Question: **Do we provide additional hearing protection equipment on THIS project?**

Hint: **See Foreman**

Hearing Protection: If you are unable to hear someone 2-3' away from you, you need hearing protection.

To Prevent Hearing Loss

Use comfortable hearing protection. Olympic has different styles.

Read the directions to make sure you wear them correctly.

When reusing hearing protection, make sure the ear plugs are clean before inserting into your ear.

Identify equipment/tools or areas on the project where hearing protection is needed.

If possible, relocate loud equipment to minimize the noise from your work area.
