Working Around Heavy Equipment

75% of construction related "struck by" and "run over" fatalities involve heavy equipment. Heavy equipment can be dump trucks, exterior/interior forklifts, skid steers, aerial lifts, dozers, etc. Safely working in the area of any heavy equipment requires the shared responsibility of both the equipment operator and trade workers. Many times when workers think they can be seen by the operator of heavy equipment, they cannot. You may be in a blind spot or the operator has been driving in a designated travel path for a period of time and the only thing that has changed is *you*!

Make eye contact with operator before walking into their work area.

Last week's Bonus Question: Items that we worry about during the last 3 months of the year, that may take our minds off of working safely?

Answer: Kids after school activities, getting the yard work done before the snow comes, getting a flu shot as to not get sick, upcoming hunting seasons, how far will the MN Twins go in the playoffs...

For **inspection packets or repair tags** call **Dave Sangren @ (612) 644-3136** to have some delivered to your jobsite.

Any questions give Sturg a call (612) 221-8603

PLEASE PRINT YOUR NAME!!!
