Hearing Protection

Doctors are able to wash debris from an eye, bandage a cut finger, ice and wrap a sprained ankle, etc. However, they are not able to repair hearing loss.

General Rule of Thumb: If the area you are working in has noise loud enough that you are unable to hear someone speak to you from *2-3 feet away*, **you need to be wearing hearing protection.**

.. Make the correct decision today ..
to wear hearing protection,
or a hearing specialist will help you
make a decision later in life.

Last week's Bonus Question: If I have a question regarding our aerial lifts, who should I direct that question to?

Answer: Go to your Foreman regarding questions or concerns you have with the aerial lift you are using. They can reach out to the vendor we're renting the equipment from to send a service tech to resolve these issues.

Inspect your equipment (*scaffold, aerial lifts, ladders, fall protection, electrical cords, etc., etc.*) prior to the start of each work shift.

For **inspection packets or repair tags** call **Dave Sangren @ (612) 644-3136** to have some delivered to your jobsite.

Please call Dave if your jobsite is in need of hand sanitizer, bleach cleaner, masks, etc.

Any questions/concerns, please give Sturg a call (612) 221-8603

PLEASE PRINT YOUR NAME

(Foreman review sheet, verify crew members names are legible)

Record to beat 378 days!!!

As of August 13, 2020 we have worked 7 days without a Lost Time Injury.

We have safely worked 10,584 hours towards our ATV goal of 150,000 hours!

Toolbox Talks winners for last week **Chris Fitzer @ Abel-Conn, Don Kolhoff @ YMCA
Ron Watters @ LakeHaus, Aron Strouth @ Spire Bank & David Almaraz @ 270 Henn**

This week's Bonus Question: **Where do we keep extra hearing protection supplies on this jobsite?**

Hint: **See Foreman**

"Building a Safer Place to Work" one week at a time.

Hearing Protection: If you are unable to hear someone 2-3' away from you, you need hearing protection.

To Prevent Hearing Loss

Use comfortable hearing protection. Olympic has different styles.

Read the directions to make sure you wear them correctly.

When reusing hearing protection, make sure the ear plugs are clean before inserting into your ear.

Identify equipment/tools or areas on the project where hearing protection is needed.

If possible, relocate loud equipment to minimize the noise from your work area.
