7 Reasons Why

It is important that we do not take shortcuts in safety. It is not good enough to just to a pretty good or fair job of providing a safe work place. Safety procedures must be followed precisely and done completely to be effective. If you are unsure of the proper safety procedures required for a task on your job it is your responsibility to find out what is required. Discuss the issue with your foreman and in the event that the foreman is unsure contact Mike Sturgeski for a Site Specific Plan. Make sure your co-workers are following the instruction we have received. We are continuing adding new employees and it will be the responsibility of all of us to insure that they understand Olympic's safety procedures.

Last week's Bonus Question: What is the closest Minnesota Occupational Health Clinic to this jobsite?

Answer: The answer was the same due to both winners were working in Minneapolis. As you have seen on our maps, MN Occ Health Clinic has 4 locations throughout the Metro: Blaine, St. Paul, Shakopee & Eagan. When we work outside the Metro, our Foreman contact the office for the Occupational Health Clinic in the city they are working in.

Inspect your equipment (*scaffold, aerial lifts, ladders, fall protection, electrical cords, etc., etc.*) prior to the start of each work shift.

For inspection packets, repair tags or **SAND** call Dave Sangren @ (612) 644-3136 to have some delivered to your jobsite. **Please call Dave if your jobsite is in need of COVID supplies: hand sanitizer, bleach cleaner, masks, etc.**

Any questions give Sturg a call (612) 221-8603

PLEASE PRINT YOUR NAME

(Foreman review sheet, verify crew members names are legible)
