RE: PwC Milwaukee – 833 E Michigan St.

Dear Jeff

I wanted to take this opportunity to recognize your team on the Price Waterhouse Coopers project located on the 12<sup>th</sup> floor of 833 E Michigan.

We started this very aggressive project in early September and your team was mobilized from basically day one. As with most projects there were some drawing discrepancies and building challenges to overcome. Throughout the entire project your team was a member of our team, nothing was ever adversarial. They were a part of every solution. If there was a problem they came to us with solutions not “here is a problem tell me what to do”.

The project turns over in 2 weeks and looks spectacular. This is the sixth project we have completed for PwC and I have to say the drywall work is the best I have seen on any of the projects. Your team had a tremendous attention to detail and wanted make sure everything was perfect.

I would like to extend a big Thank You to yourself, Al Richardson and the rest of the Olympic Companies team on site that I didn't get a chance to meet. You guys were a big part in making this project as successful as it was.

Yours sincerely,

*Michael E. Cashin*
